Professional Summary

Backend Engineer with 5+ years of experience building scalable, high-performance applications. Specialized in Node.js, MongoDB, MySQL, and API design, with a strong focus on system scalability, concurrency handling, and customer-centric solutions. Experienced in remote-first collaboration, mentoring teams, and driving business-focused engineering outcomes. Passionate about building infrastructure that powers the future of global work.

Core skills

- Languages & Frameworks: Node.js, React Js, Elixir (Phoenix, LiveView), Python (secondary)
- Databases: MongoDB, MySQL
- API Development: REST, JWT, Input Validation, Queue-Based Systems, Security
- Cloud & DevOps: AWS (Lambda, S3, DynamoDB), Docker, Kubernetes (basic), CI/CD
- Collaboration: Remote-first teamwork, Agile, Asynchronous Communication

Experience

Adept Technologies, Nairobi— *Software Developer* .

Sept 2022 - March 2025

- Designed and maintained distributed backend systems in Node.js, supporting millions of monthly transactions.
- Optimized MongoDB queries and performed migrations, reducing latency and improving data integrity.
- Developed and secured RESTful APIs with JWT authentication and input validation.
- Implemented queue-based systems to manage concurrency and idempotency in payment processing pipelines.
- Mentored junior developers, introduced design pattern best practices, and led code reviews.
- Collaborated with cross-functional, remote-first teams from varied time zones to deliver features from discovery to deployment.

Gs1Kenya, Nairobi— *Software Developer*.

March 2022 - March 2022

- Developed and maintained Node.js and React.js applications.
- Deployed and maintained web applications on cloud platforms, ensuring high availability and scalability
- Utilized Tailwind to create responsive and visually appealing interfaces.
- Implemented RESTful API integrations for seamless communication between systems
- Built reusable react components ensuring a smooth user experience.
- Documented technical processes and APIs.

Cubic Sides LTD, Nairobi— *Front End Developer.*

March 2022 - March 2022

- Designed and implemented several client websites with a focus on usability and responsive design using React JS.
- Worked closely with clients to ensure the projects aligned with their brand identity and goals.
- Contributing to improvements on front-end designs.
- Participated in Agile sprints and contributed to the delivery of features on time.

Education

Oracle University ~ Certified Data Science Professional

October 24, 2025

Oracle University ~ Certified AI Foundations Associate

October 16, 2025

Technical University Of Kenya, Nairobi ~ Bachelor of Science in Communication and Computer Networks

Sept 2014 - Sept 2018
